**REMARKS ORDERED PRINTED**

On motion of Senator Perry and by unanimous consent, the remarks by Senator Perry regarding **CSSB 5** on suspension of the regular order of business were ordered reduced to writing and printed in the Senate Journal as follows:

**President:** Senator Perry, for what purpose?

**Senator Perry:** A question or two, but mainly a statement and I go ahead and, I know we normally do this after the fact, but if we would record what I’m going to say in the Journal, ahead of time, if it’s easier for you guys to take note. Surely to establish, Senator Nichols, or Chairman Nichols and I, as well as many, have been
working on this initiative for a while. And I want to state that the bill’s good. It’s a great starting point. I mean, it’s where it needs to be, but for purposes of intent I want to make sure the concerns I have with where we’re delegating in a very nonprescriptive way. A lot of times we write legislation assuming that the objective is clear and they have full authority to meet the objective. The bill does a great job of giving an objective and it also does a pretty good job of saying who should be responsible for it. But I want, under no uncertain terms, there to be any confusion as to where we want to be when this process is done. And that’s pretty much anybody and everybody in the State of Texas that desires to have broadband availability that’s reliable and affordable, hopefully, should have that if we meet our objective. With that the bill gives some guidance as to an 80-20. I want to make sure what I understand the 80-20 to be and what I think it should be. Eighty-twenty is not a endpoint, we had to start somewhere. It’s a beginning point of a conversation. If you look at a broadband map today, as Chairman Nichols has said, you probably are above 90 percent coverage in the State of Texas, according to some authorities, which is absolutely not true. I know in these conversations we’ve had, we’ve got people that have providers, fibers going right down their alleyway but yet no ability to connect to their home because the provider said, we won’t do that. But you can argue that they have access and it’s not correct. So, as we go through this I want this council and I want this development office to understand objective is for those that desire it and want it, it’s available. When we’re done, we’ll have demarked those houses. Demarked means the last mile and I’m getting into the weeds a little bit, but there’s the middle mile and there’s the last mile, and the last mile is from wherever your provider is to the house. And it’s that piece that if we’re not clear in our intentions that we hope to achieve, we will end up status quo exactly where we are only several millions, hundreds of million dollars from a federal level in the hole with nothing to show for it. So, I speak specifically today to the service providers that are critical in making this objective work. We need all of our service providers on board to meet the objective. And why I say that is that will mean they will have to be willing to do some things that currently they’re not wanting to do to meet this objective. So, the development office needs to have the courage, the direction, and the Legislature’s support to move this agenda to where it needs to be. And if we do not back that agenda with the full force of the Legislature and the opportunities that we have to going forward, we will have spent, as I say, the first round of money, feds have sent some money to the state already, $347 million. It went to these people that may have had somebody in the area, but they were not demarked so this requires them to do that. There’s another round of that money. We need to be actively engaged in those conversations. So, the intent of this is to make it available to those people that want it, not for a provider group to say, we’re there, we’re covered, we don’t worry about it but yet they never went the last mile, Mr. Chairman.

Senator Nichols: Okay, I was waiting for my turn.

Senator Perry: I’m sorry.

Senator Nichols: You’ve been crystal clear all the way through and we’ve discussed it over quite a bit. And we’ve worked on the language to try to accomplish what you and I believe, but just so, to simplify it, when we say a street or a road is covered, has
coverage, to us it means each street address, each address. If you got an address whether it's a business or a home it's either served or it's not served. And if it's not served, then the question is can it be served within one billing cycle. And if it can be served within one billing cycle then it's served. And none of the maps to date were like that. As I explained, they were Census maps and some of my counties the entire Census, you know, there's a whole county, and if one person got the service, they showed it was served. The other thing the feds did several years back was they had two definitions from high speed Internet. They had one for the urban areas which is 25/3 and then they had a, one for the rural saying it's 10/1. I believe that's right.

Senator Perry: Right.

Senator Nichols: And I'm going, high speed's high speed. So, we made, we were very clear in here that high speed is 25-30 unless the FCC changes the definition higher in which case we automatically go higher.

Senator Perry: Right.

Senator Nichols: But, yes, I heard you loud and clear, and I think what you're saying is very important. That's certainly my intention as well.

Senator Perry: And I think we hit it. I think you got there. I just think it's important for us to set the expectation, what that really means, it means demarked to the house.

Senator Nichols: And the development office people can come watch this archive.

Senator Perry: That's right. That's, that's where I'm at is I don't want--

Senator Nichols: Gotcha.

Senator Perry: --anybody to be able to say we, we saw 80-20 or we saw 95-5 and nothing changed and pat their self on the back. Lot of taxpayer money went to somebody and nothing got done. But I appreciate you, your office, Tina's been awesome, of making sure those communications have been open. This has been going on with me for years, truthfully, and I felt like I had a good grasp on it, but it was very frustrating to have some communities say, on the map we're covered but there's only two people that's got it in the whole county. So, that's what this bill is intended to fix. Thank you, Mr. Chairman.

Senator Nichols: Thank, thank you for your input.
